## EXPERTISE

### Field

Electrical Engineering

### Expertise

Electronics

### Specialization

None

## RESEARCH CONTRIBUTION & ACHIEVEMENT

My research interest is focused on the areas of electronics, including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions. My recent research work focuses on the electronic system used in monitoring system for hydroponic plants. This research comprises electronic control systems, hardware development combined with Internet of Things (IoT). This ongoing research is funded under TATIUC Short Term Grant (Phase 1). I have participated in innovation and exhibition (i-Compex 2017 & i-Compex 2018) for two consecutive years with silver medal award winning .
