ABOUT US

University College TATI (UC TATI), through its Business Unit, offers a wide range of high-quality services tailored to meet the needs of individuals, organizations, and communities. Renowned as a leading educational institution, UC TATI provides services such as modern facility rentals equipped with state-of-the-art amenities for formal or informal events, various short courses designed to enhance professional and technical skills, and innovative products developed through impactful research by experts. Additionally, UC TATI offers comfortable and strategically located accommodations as well as professional catering services to cater to diverse event requirements.

With a blend of experience, expertise, and commitment to quality, UC TATI not only delivers comprehensive solutions but is also dedicated to being your trusted partner in achieving personal and business goals. Choose UC TATI – the destination for innovation and reliable services.

UC TATI MACHINE UNIT

01 Precision Turning

- We offer a full range of turning services utilizing manual and CNC Turning machines.
- Our 5-axis and 9 axis CNC Turning machines utilize to produce complex components in a single operation.
- We have turning machines that are required to produce precision parts for oil & gas, automotive and manufacturing industries.

02 Precision Milling

- Our manual milling and CNC Milling machines are perfect for both one off prototypes and low volume production.
- We machine parts from various type of metal and plastic materials.
- We can mill complex 3D surfaces, on our 5-axis machining centres and hold critical geometric tolerances.

03 Precision Grinding

- Our grinding services include cylindrical and surface grinding.
- Our capabilities allow for handling soft or hard materials.

04 CNC EDM Sinking

- EDM Sinking is the ability to produce complex shapes without inducing stresses into the material and does not cut all of the way through the material (unless desired).
- We are ready to fabricate hardened materials, moulds and dies parts, blind cavities, keyways and thin walls.

05 CNC EDM Wire Cutting

- Using a strand of wire as a cutting tool creates a linear line and therefore our Wire EDM services used to cut all of the way through the material.
- Our Wire EDM is best suited for projects that have complex profile, intricate tolerances, material stress limitations and surface finish requirements.

List of Equipment :-

- Conventional Lathe & Milling
- CNC Milling, CNC Lathe & Turnmill
- Surface and Cylindrical Grinding
- EDM Die Sinking & Wirecut
- Metrology Equipments
- Rapid Prototyping
- Engineering Drawing (2D&3D)
- Solid Modelling (3D)
- Product Design
